**<ToDoList />**

```
state = {
  tasks: [
    { id: … , name: … , isDone: …, description: ... },
    { id: … , name: … , isDone: …, description: ... }
  ]
}
```

<Summary />

**TASKS COMPLETED:**

<Task />

```
state = {
  taskCompleted: true
}
```

<Task />

```
state = {
  taskCompleted: true
}
```

<Task />

```
state = {
  taskCompleted: true
}
```

**<ToDoList />**

state = {
  tasks: [
    { **id:** … , **name:** … , **isDone:** …, **description:** ... },
    { **id:** … , **name:** … , **isDone:** …, **description:** ... }
  ],
  **tasksCompleted: 3**
 }
}

**toggleTaskDone()**

Lift the state from **<Task>** into **<ToDoList>** which is a common ancestor of:
**<Task>** and **<Summary>**

**<Summary />**

**TASKS COMPLETED:** 3

<Task />

state
  tasksCompleted: true
}

<Task />

state
  tasksCompleted: true
}

<Task />

state
  tasksCompleted: true
}

onClick={ ()=> **toggleTaskDone()** }

**<ToDoList />**

state = {
  tasks: [
    { **id:** … , **name:** … , **isDone:** …, **description:** ... },
    { **id:** … , **name:** … , **isDone:** …, **description:** ... }
  ],
  **tasksCompleted: 3**
}

Lift the state from **<Task>** into **<ToDoList>** which is a common ancestor of:
**<Task>** and **<Summary>**

**tasksCompleted** are passed as a prop

**<Summary />**

**TASKS COMPLETED:** 3

<Task />

state
  tasksCompleted: true
}

<Task />

state
  tasksCompleted: true
}

<Task />

state
  tasksCompleted: true
}
